PROJECTS

SkillZone - (Team Project)

[GitHub Client Side](#) | [GitHub Server Side](#) | [Live Link](#)

Developed a full-featured website for SkillZone, a leading IT training institute in Chittagong. The platform showcases courses, categories, and institute information with a clean UI and responsive design, built to improve accessibility for students and potential learners.

Features:

- Course Management: Displayed courses with details like duration, level, and pricing.
- Category Filtering: Organized programs into categories for better navigation and discovery.
- Responsive Design: Optimized for all devices with modern UI/UX practices.
- Dynamic Content: Built data-driven components for course details and enrollment info.

Tech-Stack: React.js, Tailwind, Auth0, Node.js, Express.js, MongoDB, Axios.

Hourent - Rental management platform

[GitHub Client Side](#) | [GitHub Server Side](#) | [Live Link](#)

Hourent is a user-friendly rental management platform that allows individuals to browse, book, and manage rental houses and apartments.

Features:

- Property Listings: Displayed rental houses and apartments with details, images, and pricing.
- Search & Filters: Enabled filtering by location, price, and property type.
- Responsive UI: Built a clean, mobile-first design for accessibility.
- Authentication & Authorization: Secure login and role-based dashboard for users and admins.
- Booking Management: Allowed users to book rentals and manage reservations seamlessly.

Tech-Stack: [React.js](#), Firebase Auth, Node.js, Express.js, MongoDB, Axios.

Tourrido - Travel & Tour Booking Platform

[GitHub Client Side](#) | [GitHub Server Side](#) | [Live Link](#)

Turido is a travel platform where users can explore destinations and book tours. It features easy search, filtering, and reviews to help travelers find and book the best experiences.

Features:

- Advanced Search & Filtering: Users can search by destination, category, and price range.
- Review System: Travelers can share and read reviews to make informed choices.
- Responsive UI: Optimized layouts for mobile, tablet, and desktop.
- User Authentication: Secure login and personalized booking management.
- Booking Flow: Simple and reliable booking process with role-based features.

Tech-Stack: React.js, daisyUI, Node.js, Express.js, MongoDB, Axios
